

TECHNICAL SHEET
TT-REVO

TT-Revo, the KYT full face helmet whose shell is produced in ADT-advanced thermoplastic, a mix of thermoplastic resins with high resistance to crashes.
Its captivating and extreme shapes have been studied in the wind tunnel, to achieve the best performances without neglecting style and ergonomic.
The fine visor mechanism has been designed to offer practicality and efficiency at the same time.
Precious inners have been optimized to offer the best performance for comfort and outflow of the air.
The collaboration with aeronautics engineer, the use of special software and the wind tunnel gave life to this innovative helmet: strong, comfortable and performing.
TT-Revo, the racing helmet to stand out every day.

SHELL
Shell is made in three sizes (S, M and L), ADT-advanced thermoplastic, a mix of thermoplastic resins with high resistance to crashes.

PROTECTIVE POLYSTYRENE
Internal polystyrene realized in three sizes (XS, M and L) to obtain a better ergonomics and a variable density. This characteristic allows a gradual and progressive absorption of the energy produced by the impact.
Even if the bigger part of the energy created by the impact is absorbed by the external shell, thanks to its deformation, the role of polystyrene is determinant for the absorption of the residual energy.

VISOR
The visor is made of polycarbonate, with anti-scratch treatment. The new ratchet allows the visor removal without tools. TT-Revo has a brand new lock system (PAT PEND) to fix the visor during the riding in the close position.

DISTRIBUTOR FOR EUROPE
Suomy Motosport S.r.l.

TECHNICAL SHEET
TT-REVO

PINLOCK
TT-Revo is MAX PINLOCK 70 ready.

VENTILATION
Particular channelings obtained on polystyrene allow to work in symbiosis with the several air intakes to obtain an optimal ventilation into the helmet and a quickly exhaust of the hot air. TT-Revo has five air intakes on the front and four air extractors under the aerodynamics spoiler.

INNERS
They are made of soft breathable bi-elastic fabric with synthetic fibers, that offer a high sweat absorption and keep fresh and dry.
The cheek pads are easily removable and they are available with different thickness.

RETENTION SYSTEM
QRM-micrometric: The retention system is equipped of micrometric buckle.

TECHNICAL SHEET
TT-REVO

Homologations:	ECE 22-06
Commercial Name:	KYT TT-REVO
Description:	Full face protective helmet
Materials shell:	adt – advanced thermoplastic
Polystyrene:	polystyrene produced in three sizes (S-M-L)
Visor:	antiscratch protective visor, antifog system Max Pinlock 70 ready
Retention System:	polyestere tape with micrometric buckle
Spare parts:	nose deflector and chin guard
Approx. Weight:	1500 ± 50 in small shell
Nr. shell:	3
Nr. polystyrene:	3

SHELL SIZE	**S**		**M**		**L**	
EPS SIZE	**S**		**M**		**L**	
COMMERCIAL SIZE	**XS**	**S**	**M**	**L**	**XL**	**XXL**
CIRCUMFERENCE CM	**53-54**	**55-56**	**57-58**	**59-60**	**61-62**	**63**

NOTE

- All information and features in this data sheet are valid only for the current helmet version in compliance with the mentioned homologation. These features can be changed in case of new homologation requests and/or extension of the current ones.
- All the Kyt products are constantly subject to a continual improvement process, that's why Kyt reserves the right to make changes, without prior notice, to the products object of this technical sheet. It is therefore not possible to exercise any rights on the basis of the information, illustrations and descriptions contained in this technical sheet.
